### Assertion Reason question type

The following assertion and reason relate to discussion tools within a virtual learning environment. Read the assertion and associated reason and then choose the corresponding answer to indicate whether the assertion and/or reason is/are true.

A virtual learning environment which can provide a mechanism for group discussions, may be beneficial to learners with a cognitive disability. The speed of response and the nature of asynchronous discussions being spread over a slower timescale may relieve the pressure of face to face or synchronous discussions for someone with additional support needs.

- a) Assertion is true and reason is true and the reason is a correct explanation of the assertion.
- b) Assertion is true and reason is true but the reason is not a correct explanation of the assertion.
- c) Assertion is true but the reason is false.
- d) Assertion is false but the reason is true.
- e) Assertion is false and the reason is false.
